

CLOUD HOSTED SOLUTION

Sound familiar?

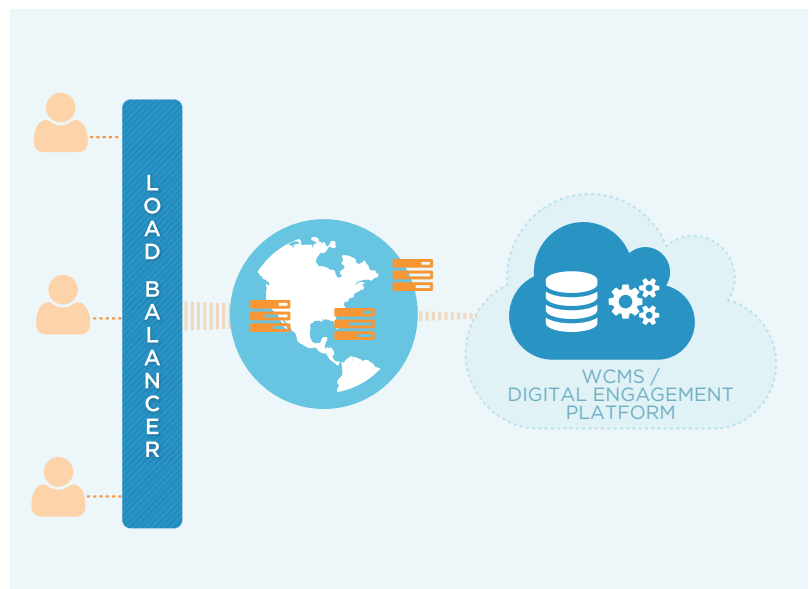

- Website goes down at 2am. Who gets the call?
- Worried about your site's availability particularly at crucial enrolment periods or during extreme weather?
- Want to quickly, easily or temporarily increase capacity?
- Server infrastructure and maintenance proving costly and time consuming?

Piece of mind without the investment

The Cloud is more than a buzzword – it's an unprecedented shift in how hardware can be provisioned minus the capital expense and prohibitive TCO.

TERMINALFOUR's Cloud Hosting Solutions takes the worry out of planning and maintaining your Web and WCMS infrastructure by leveraging Cloud based resources with real human support watching your back.

Let TERMINALFOUR deploy, migrate and monitor your Web and WCMS to help ensure that your site is always available regardless of how much in demand it is or where your visitors are coming from.

Benefits

- Quickly provision new instances to add capacity during periods of increased demand
- Let certified data centre security specialists take care of your data in a strictly controlled environment
- Lower Total Cost of Ownership (TCO) over the lifetime of the project
- Use Origin and Edge servers to geographically distribute content to locations closer to site visitors
- Take advantage of enterprise level load balancing to ensure your site is always available even when demand is high or in the event of DDOS attacks
- Service levels between 99.9% and 99.999% depending on configuration
- Added redundancy to offset physical server down-time
- Around the clock monitoring
- ISO 27001 and SAS 70 accredited provider
- Hosted WCMS only PaaS environment for your complete web infrastructure
